ABOUT MIRIAM MELING

Miriam has worked with value generation from new technologies and IPR for the last 14 years. She is experienced within development of commercialization strategy, business cases building for early-stage technology and invention assessments. In addition, she has 8 years of experience from working in the Research Council of Norway developing policy instruments, assessing applications, specializing in commercialising R&D results and bringing new products and services to the market.

She is passionate about early-stage technology development, and in June 2024 she joined Zacco as a senior advisor R&D funding specialist. As a dedicated teamplayer she is proud to be a part of Zacco's R&D funding team and helping companies raise funding for their R&D projects.

Miriam has an academic background in physics from NTNU and Louis Pasteur University in Strasbourg, France, combined with a MSc in Innovation and Entrepreneurship from the University of Oslo. Throughout her career she has been involved in projects in a wide span of disciplines and she has a good overview of the public support system and opportunities that are available.

She has previously been a part of another IP company's commercialization team, where she was involved in executing projects for clients such as early-stage technology startups, industrial companies, investors, technology transfer offices and universities.
