ABOUT GUSTAF SÄRNER

Gustaf joined Zacco in 2019. He has been working in the IP field since 2008 and is specialised in drafting patents, prosecuting patents, infringement issues, patent litigation, IP strategies, evaluation of patents, novelty searches, freedom-to-operate analysis, patent due diligence, and IP monetisation strategies.

Gustaf has previously worked as a researcher in Laser Diagnostics in Combustion at the Division of Combustion Physics at Lund University where he took his PhD.

Gustaf also founded a web-based IT company in 2005, where he developed a database-driven web environment and also worked with the strategic and administrative development of the company.

He holds an MSc degree in Engineering Physics from Lund Institute of Technology, Sweden, as well as a PhD in Laser Diagnostics from Lund University, Sweden. Gustaf further holds a BSc in Business Administration and Economics from Lund University.

Gustaf is a European Patent Attorney and a member of the Institute of Professional Representatives before the European Patent Office (EPI). Gustaf is also a European Patent Litigator authorised to represent clients before the Unified Patent Court and holds a European Patent Litigation Certificate (Maastricht University/ERA).

AREAS OF EXPERTISE

Services

Patent Monitoring
Strategy Development
IP Audit
Patent Litigation Support
Freedom to Operate
Novelty Search and Validity Search
Patent prosecution
Patent Drafting
Patent Oppositions and Appeals
Portfolio Management
Competitor Watch
Due Diligence

Technical field

Computer Sciences
Sensor and Measurement Technology
Machine Learning
Mechanical Engineering
Internet of Things (IoT)
Digital Signal Processing
Databases
Manufacturing & Process Technology
Artificial Intelligence
Electronics
Information Technology
Physics
Signal Processing
Digitalization
Algorithms

Industry expertise

Media & Entertainment
Building & Construction
Retail
Sustainability / GreenTech / CleanTech
IT & Software
Consumer Products
Automotive
Energy, Gas, Oil & Power
Telecommunications
